

Bug Bingo!

Bugs inside. Bugs outside. Bugs in the air. Bugs under stones. Bugs hiding in the grass. How many bugs can you find?

This list is just a start! There are many more kinds of bugs. I've included a couple different types of beetles on this list, but there are hundreds of beetle species. If you live in an area with dozens of distinct beetle species, or ladybugs, or flies, or spiders, you may want to make your own list to keep track of the different species in your area!

Earwig	Cockroach	House fly	Moth	Ant
Larva or egg	Ladybug	Dragonfly	Butterfly	Millipede
Grasshopper	Large beetle		Centipede	Slug
Spider	Small beetle	Rainbow- colored beetle	Caterpillar	Pill bug (roly poly)
Fruit fly	Termite	Bee	Mosquito	Worm
